

# Postdoctoral Fellowship in Phytochemistry and Microbial Diversity

The Forestry and Agricultural Biotechnology Institute at the University of Pretoria, South Africa (<https://www.fabnet.up.ac.za/index.php>) seeks to hire a Postdoctoral Fellow for a research project studying the influence of phytochemistry on microbial diversity in *Eucalyptus*. This project will use a highly diverse population of eucalypt trees that was planted in a common garden in South Africa from seed derived from the full Australian native range (Mostert-O'Neill et al. 2021. *Molecular Ecology* 30: 625-638).

Eligibility and stipends:

- Project duration: Two years starting in January 2023
- Stipend: R 200 000 per annum
- Minimum educational requirement: PhD in Biochemistry, Bioinformatics or Microbiology
- Additional requirements: Experience in analysis of large datasets and statistics
