

UK FOREST PATHOLOGISTS ATTEND FABI WORKSHOP

Dr. Sandra Denman, a senior research scientist and project leader from the United Kingdom's Forest Research, visited FABI in November while attending the Institute's Advanced Phylogenetics Workshop. Dr Denman was joined by research assistants Andy Griffiths and Sarah Plummer.

Dr. Denman is a longtime collaborator with FABI. Though born and educated in South Africa, she has lived in the UK for 15 years. She joined Forest Research in 2003 as a tree pathologist specialising in *Phytophthora* diseases and oak declines. While attending the course she also visited the FABI Biocontrol Facility at the University of Pretoria's Research Precinct.
